REASONS FOR ALLOWANCE

1. The following is an Examiner's Statement of Reasons for Allowance:

The instant invention is directed at dual redundant associative cache directories allowing simultaneous reads. To that end, multiplexors, address tags and error correction are used.

2. Claims 1-19 were presented for initial examination. As of this amendment, claims 2, 5, 11 and 13 have been cancelled and claims 1, 6, 10, 15 and 16 have been rewritten.

3. The claim(s) listed below have been amended to more clearly distinguish this invention over the prior art in the area of information stored and its location. In view of these amendments, and on further examination and consideration, the art of record (Kalish et al., U.S. Patent 5553263 and Lee et al., U.S. Patent 5345576) do(es) not appear to specifically and explicitly teach or suggest the exact details and interplay crucial to defining concisely the instant invention: specifically, {amended claim(s) 1, 10} first and second redundant cache directories, writing both address tags and reading the memory blocks using both directories in a single clock cycle.

4. The other prior art found during the search and made of record, taken together, does not appear to teach or suggest the claimed invention:

Art Unit: 2752

USPN 5,283,876 [Tague] teaches a virtual memory unit with a plurality of directory and buffer store levels for storing page descriptor information. The memory directories and a least recently used (LRU) device constructed from the same type of standard cache address directory part include parity error detection circuits.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled, "Comments on Statement of Reason for Allowance."

6.
